Database Engineering  
Object Oriented Programming

## Projects

JAN 2023 **Complain Manager | Github Link** **HackNitr Project**  
Complain Manager is a website created using HTML,CSS and JavaScript which contain a form for submitting complaints. The purpose of the website is to allow students to send their problems faced by them in college by filling out the form where they enter information such as their name, contact details, and a description of the complaint, which is then stored in a Google Sheet.

JUNE 2023 **Doctor Appointment | Github Link** **Full Stack Project**  
The Doctor Appointment website, built using ReactJS, Node.js, and MongoDB, facilitates the process of scheduling appointments with doctors. The website consists of an "Apply Appointment" form where users enter information about the doctor, including their specialization and other relevant details. This data is then sent to the admin for review and approval. MongoDB stores information about registered users, doctors, admin.

## Achievements/Certifications

2022-NOW **Leetcode** **Profile Link**  
Max Rating : **1468**

## Extra Curricular Activities

2023-PRESENT **ASTRO NITR** **Web Developer**  
As a web developer in the club, my role revolves around creating the club's website and designing and implementing a captivating layout for the website.

2023 **Publicity Team** **Nitrutsav**  
I was participated in NITRUTSAV fest as a coordinator in publicity team. As a coordinator, my responsibilities primarily revolved around planning and executing various publicity strategies to ensure maximum participation and engagement from the college community.

2021-22 **National Service Scheme** **NSS**  
Being a part of NSS was an immensely fulfilling journey. It provided me with the platform to serve society, learn valuable life lessons, and develop a strong sense of social consciousness.
